

You've read The Goal.

Now put that theory into practice via a hands-on, interactive role-playing workshop where you'll discover the most-effective ways to put this breakthrough business book's production lessons into action!

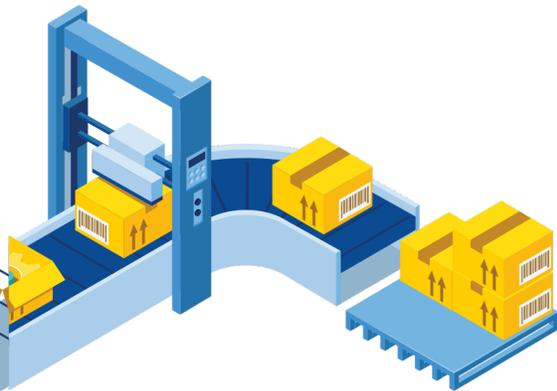

“The first course I have ever attended which kept everyone’s attention for the full duration! The combination of great content and great delivery.”

The Goal Simulation Workshop

Thursday, March 26, 2026
Hilton Mississauga/Meadowvale
9 am – 3:30 pm

Learn how to apply the inventory and production improvement techniques outlined in *The Goal* to your facility effectively and risk-free.

Plant Managers and C-Suite Executives are painfully aware that poor plant flow, overtime blowouts, poor on-time performance, and flawed cost accounting methods all destroy bottom-line results.

And many have — for years — known that the solution to their inventory and production management problems can be found in *The Goal*.

But applying the production and inventory improvement lessons of *The Goal* can be hard at first. Where do you start? How can you make mistakes and learn those valuable lessons without putting your plant (and profitability) at risk?

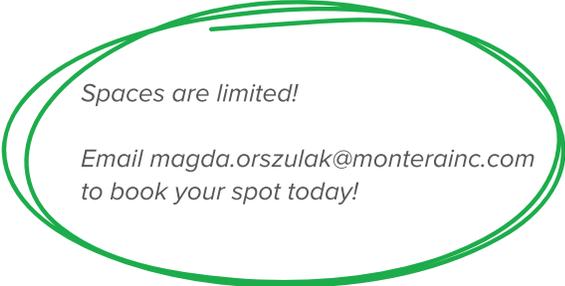

If you are keen to start implementing the ideas presented in *The Goal* at warp speed — and without falling for common traps — this hands-on workshop is for you. It will teach your management team via a realistic simulation how to use the techniques outlined in *The Goal* to:

- Increase productive capacity
- Improve on-time delivery
- Reduce inventory
- Reduce costs
- Increase net profit

Workshop pricing

- \$750 – Individual registration
- \$690 per person – When registering 2 participants
- \$600 per person – For groups of 3 or more

All registrations include workshop materials, lunch and refreshments.
